

TORiser

Lightweight Recycled Access cover and Gully Raising Pieces

Nottingham City Highways

Trent Bridge, Nottingham

Nottingham City Council replaced problematic gullies on the very busy Trent Bridge in the centre of Nottingham.

The lightweight TORiser sped up installation and took away health and safety issues associated with heavier concrete versions.

Due to lane widening over the years the grates are now not in the ideal position, but TORiser is designed to handle raising ironwork in the most unhospitable environments!

TORiser is performing as required and as expected.
