

TORiser

Lightweight Recycled Access cover and Gully Raising Pieces

Staffordshire Highways TORiser case study

Staffordshire Highways in conjunction with framework partner Amey installed TORiser on Station Road, Rolleston on Dove, in January 2023.

The feedback from the installation team was ease of handling and speed of install against the traditional concrete or brickwork. At less than 7KG it made for a single operative installation.

M6 class ii mortar or specified modified mortar can be used and pointed in the same manner it would be for concrete or brickwork.

Install January 2023

Inspection November 2023

The gully grate was lifted and TORiser and mortar were inspected. No defects or failure were reported.

Product is performing as designed.

Inspection 26 March 2024

Again the gully grate was raised and the unit inspected for defects.

The result was again no faults or failure.

Product performing as designed

The result is Staffordshire Highways approval for use on their network.
